

THE UNITED STATES OF AMERICA

TO ALL TO WHOM THESE PRESENTS SHALL COME:

**Rilcot Seed Company, Division of
Riley-Yieldmaster Seed Corporation**

Whereas, THERE HAS BEEN PRESENTED TO THE

Secretary of Agriculture

AN APPLICATION REQUESTING A CERTIFICATE OF PROTECTION FOR AN ALLEGED NOVEL VARIETY OF SEXUALLY REPRODUCED PLANT, THE NAME AND DESCRIPTION OF WHICH ARE CONTAINED IN THE APPLICATION AND EXHIBITS, A COPY OF WHICH IS HEREUNTO ANNEXED AND MADE A PART HEREOF, AND THE VARIOUS REQUIREMENTS OF LAW IN SUCH CASES MADE AND PROVIDED HAVE BEEN COMPLIED WITH, AND THE TITLE THERETO IS, FROM THE RECORDS OF THE PLANT VARIETY PROTECTION OFFICE, IN THE APPLICANT(S) INDICATED IN THE SAID COPY. AND WHEREAS, UPON DUE EXAMINATION MADE, THE SAID APPLICANT(S) IS (ARE) ADJUDGED TO BE ENTITLED TO A CERTIFICATE OF PLANT VARIETY PROTECTION UNDER THE LAW.

NOW, THEREFORE, THIS CERTIFICATE OF PLANT VARIETY PROTECTION IS TO GRANT UNTO THE SAID APPLICANT(S) AND THE SUCCESSORS, HEIRS OR ASSIGNS OF THE SAID APPLICANT(S) FOR THE TERM OF seventeen YEARS FROM THE DATE OF THIS GRANT, SUBJECT TO THE PAYMENT OF THE REQUIRED FEES AND PERIODIC REPLENISHMENT OF VIABLE BASIC SEED OF THE VARIETY IN A PUBLIC REPOSITORY AS PROVIDED BY LAW, THE RIGHT TO EXCLUDE OTHERS FROM SELLING THE VARIETY, OR OFFERING IT FOR SALE, OR REPRODUCING IT, OR IMPORTING IT, OR EXPORTING IT, OR USING IT IN PRODUCING A HYBRID OR DIFFERENT VARIETY THEREFROM, TO THE EXTENT PROVIDED BY THE PLANT VARIETY PROTECTION ACT. THE UNITED STATES SEED OF THIS VARIETY (1) SHALL BE SOLD BY VARIETY NAME ONLY AS A CLASS OF CERTIFIED SEED AND (2) SHALL CONFORM TO THE NUMBER OF GENERATIONS PROVIDED BY THE OWNER OF THE RIGHTS. (84 STAT. 1542, AS AMENDED, 7 U.S.C. 2321 ET SEQ.)

COTTON

'Stripper N'

In Testimony Whereof, I have hereunto set my hand and caused the seal of the Plant Variety Protection Office to be affixed at the City of Washington this fifth day of April in the year of our Lord one thousand nine hundred and seventy-six

Attest:

L. J. Rollin
Commissioner
Plant Variety Protection Office
Grain Division
Agricultural Marketing Service

Earl L. Baty

Secretary of Agriculture

APPLICATION FOR PLANT VARIETY PROTECTION CERTIFICATE

INSTRUCTIONS: See Reverse.

1. VARIETY NAME OR TEMPORARY DESIGNATION STRIPPER N	2. KIND NAME Cotton	FOR OFFICIAL USE ONLY PV NUMBER 7127	
3. GENUS AND SPECIES NAME Gossypium hirsutum	4. FAMILY NAME (Botanical) Malvaceae	FILING DATE 2-19-71	TIME 12:30 P.M.
	5. DATE OF DETERMINATION March 1, 1970	FEE RECEIVED \$ 250	BALANCE DUE \$ 0.00
		\$ 250	\$
		\$ 250	\$
6. NAME OF APPLICANT(S) Rilecot Seed Co., Division of Riley Yieldmaster Seed Corporation	7. ADDRESS (Street and No. or R.F.D. No., City, State, and ZIP Code) Rt. 2 Box 96 Hart, Texas 79043	8. TELEPHONE AREA CODE AND NUMBER 906/846-2435	
9. IF THE NAMED APPLICANT IS NOT A CORPORATION, FORM OF ORGANIZATION: (Corporation, partnership, association, etc.) Corporation	10. STATE OF INCORPORATION Texas	11. DATE OF INCORPORATION April 6, 1960	
12. Name and mailing address of applicant representative(s), if any, to serve in this application and receive all papers: Ray Joe Riley Rt. 2, Box 96 Hart, Texas 79043			

13. CHECK BOX BELOW FOR EACH ATTACHMENT SUBMITTED:

☒ 13A. Exhibit A, Origin and Breeding History of the Variety (See Section 52 of the Plant Variety Protection Act.)☒ 13B. Exhibit B, Botanical Description of the Variety☐ 13C. Exhibit C, Objective Description of the Variety☒ 13D. Exhibit D, Data Indicative of Novelty☒ 13E. Exhibit E, Statement of the Basis of Applicant's Ownership14A. Does the applicant(s) specify that seed of this variety be sold by variety name only as a class of certified seed? (See Section 83(a). (If "Yes," answer 14B, and 14C below.) ☐ YES ☒ YES ☐ J ☐ J14B. Does the applicant(s) specify that this variety be limited as to number of generations? ☐ YES ☐ NO14C. If "Yes," to 14B, how many generations of production beyond breeder seed? ☐ F O U N D A T I O N ☐ REGISTERED ☒ CERTIFIED

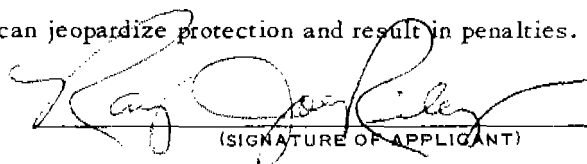

The applicant declares that a viable sample of basic seed of this variety will be deposited upon request before issuance of a certificate and will be replenished periodically in accordance with such regulations as may be applicable.

The undersigned applicant(s) of this sexually-reproduced novel plant variety believes that the variety is distinct, uniform, and stable as required in Section 41 and is entitled to protection under the provisions of Section 42 of the Plant Variety Protection Act.

Applicant is informed that false representation herein can jeopardize protection and result in penalties.

(DATE)

(SIGNATURE OF APPLICANT)

INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$250.00 fee to U.S. Dept. of Agriculture, Agricultural Marketing Service, Grain Division, 6525 Belcrest Road, Hyattsville, Maryland 20782. (See Section 180.175 of the regulations and rules of practice.) Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

- 5 Insert the date the applicant determined that he had a new variety based on the definition in Section 41 (a) of the Act and decision is made to increase the seed.
- 13a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 13b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 13c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 13d Provide complete data indicative of novelty. Seed and plant specimens or photographs of seed and plant comparisons clearly indicating novelty may be submitted. Seeds submitted may be sterile.
- 13e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

ATTACHMENTS TO FORM GR - 470
(12-15-72)

12 A. Exhibit A, Origin and Breeding History of the Variety

The line of cotton designated and tested successively as Dilcot N-4; Stripper-calls II; and N-4 resulted from selections made from a variable population of CA-398, a ~~steriproof~~ breeding stock obtained under a memorandum of agreement of cooperation and exchange of material with the Texas Agricultural Experiment Station at Lubbock, Texas, and Dilcot Seed Co.

The original selections were made for steriproofness, earliness and yield. Further fiber refinement was made on the basis of a staple length of approximately 1 inch and a 2.5% Span length reading of .99 to 1.04; micronaire of 4.0 and 90,000 PSI fiber strength.

The original selections were made in 1962 and subsequently planted in a plant to row block for identification, observation and further selection or discarding in the case of off-types.

Off-types of mostly open boll types and tall plants were removed from the individual plant rows.

Progeny of the plant rows of near identical type were massed and bulked after yield and fiber testing to verify uniformity in other than visible characteristics.

As previously stated, variants during reproduction and multiplication were loose and string/line (open type) lint bolls and plant types 4 to 6 inches taller than the mean of the population. In the early stages of selection the frequency of the off-type plants was at a rate of an average of 1 off-type to 2000 from the total population. The variety is now stable and only an occasional off-type occurs at a frequency of less than 1 plant to 2,000 population on a strict evaluation.

12 B. Exhibit B, Botanical Description of the Variety

The seed of Stripper N is of the glanded type with short linters after ear ginning. The plants in the emergence, cotyledon, seedling and early stages of growth are more vigorous than the Dilcot 90 variety. Stripper N is a prolific fruiter and sets a high percentage of the early flowers that bloom rendering the variety to be relatively early. The variety Stripper N is characterized by being early, about one to five days later than Dilcot 90, a very early variety.

The mature plant is relatively short, being about 3 to 6 inches shorter than Dilcot 90 grown under similar conditions.

The fruit is a round type, medium small boll born on short stem containing both four and five locules per boll with a predominance of five locule bolls under most conditions. Carpels curve inward to form a steriproof, tight boll type. The bolls are larger than those of Dilcot 90. The boll size being in the range of 5.0 to 6.0 grams of seed cotton per boll. The seed index is in the range 10.0 to 13.0 grams per 100 seed. The lint index is greater than Dilcot 90, being 5.5 to 6.25 for Stripper N compared with 5.4 to 6.0 for Dilcot 90.

The flowers are complete, moderately large and are white to creamy colored on opening.

The root is a deep, vigorous taproot with laterals.

The stem is a main central stem with short vegetative and fruiting branches or laterals. Deep or darkish red to maroon colored stems and petioles are typical when in a mature or nonvegetatively growing portion of the plant. Vegetative and active growing terminal parts are green color.

The leaves are medium to medium large, three lobed, moderately smooth and are glossy on the upper portion.

The plant is short to medium height and compact.

12 C. Objective Description of the variety enclosed

12 B. Exhibit 9, Data Indicative of Novelty.

Novelty is based on the unique combination of the following characters:

Stripper N has extremely compact stemproof bolls of the Macha parent that very few other varieties possess. These varieties having this stemproof type boll to the degree of Stripper N either have (1) shorter fibers or weaker fibers or both; or they are later maturing or taller or both; (2) or they have other combinations of shorter fibers, weaker fibers, later maturing plants or taller plants, or all of the above differences.

12 C. Statement of the Basis of Applicant's Ownership.

The owner and applicant, Pilot Seed Co., Division of Hilary McCombmaster Seed Corporation is the employer of the breeder, Ray Joe Hilary, Licensed Texas Registered Plant Breeder, and believes it is the sole, original and first breeder of Stripper N variety of cotton for which it solicits a certificate of protection.

OBJECTIVE DESCRIPTION OF VARIETY

COTTON (GOSSYPOLIUM SPP.)

INSTRUCTIONS: See Reverse.

NAME OF APPLICANT(S) Rilcot Seed Co., Division of Riley Yieldmaster Seed Corporation	FOR OFFICIAL USE ONLY PVPO NUMBER 7127
ADDRESS (Street and No. or R.F.D. No., City, State, and ZIP Code) Rt. 2, Box 96 Hart, Texas 79043	VARIETY NAME OR TEMPORARY DESIGNATION Stripper N

Place the appropriate number that describes the varietal character of this variety in the boxes below.

Place a zero in first box (e.g. 0 8 9 or 0 9) when number is either 99 or less or 9 or less.

EXHIBIT D

Data Indicative of Novelty

Novelty is based on the unique combination of the following characters:

'Stripper II' most closely resembles 'Midcot 90' but is more vigorous from germination through early growth stages, 1-5 days later in maturity, an average of 2-3 inches shorter than Midcot 90 under most conditions, has larger bolls than Midcot 90 (0.5 grams larger bolls than Midcot 90) (5.0-6.0 versus 4.5-5.5 grams seed cotton/boll), 1.0-2.0 grams higher seed index than Midcot 90 (10.0-12.0 versus 9.0-10.0 grams/100 seed), 0.0 - 0.25 greater lint index than Midcot 90 (5.5-6.25 versus 5.0-6.0), an average of 0.5 lower micronaire than Midcot 90 (3.5-4.0 versus 4.0-4.5), 0.5 longer 1.5% span length fiber than Midcot 90 (1.01 versus 0.96) and 'Stripper II' has slightly more compact or sturdier bolls than 'Midcot 90', and slightly less leaf pubescence than 'Midcot 90'.

15. BOLLS:

<input type="checkbox"/> 2	Locules: 1 = 3-4 2 = 4-5	<input type="checkbox"/> 3	<input type="checkbox"/> 6	NO. SEEDS PER BOLL	<input type="checkbox"/> 3	<input type="checkbox"/> 5	<input type="checkbox"/> 1	LINT PERCENT	<input type="checkbox"/> 3	<input type="checkbox"/> 6	MM. DIAMETER

November 27, 1968

To: Cooperators of Regional Cotton Variety Tests
From: C. F. Lewis and T. Kerr C.F.L. T.K.
Subject: Partial Summary of 1967 Data

Results of the 1967 regional cotton variety tests will be published in an ARS 34 series bulletin as usual. We are experiencing some delay. New computers have been installed which required complete programming of the process. In the meantime we hope this partial summary will be useful to cooperators.

The tables are regional means, combining all stations within a region, for yield, 2.5% span length, micronaire values, T₁ and 22's yarn strength.
